D O O R C O M P A N Y

Signature quality and innovation since 1966.

Elegantly crafted to complement your home's architectural style.

Model 84-shown in White with optional Stockton windows and decorative hardware.

Classic in style. Innovative in design.

Our Special Reserve Series gives your home an exceptional, classic look. We've taken the timeless beauty of carriage house garage doors and combined it with the latest in design engineering to create a door that will be as durable as it is beautiful.

With six distinctive styles, three classic colors and your choice of windows, you'll be able to create the perfect look to complement your home's architectural style and make it uniquely yours.

What makes the Special Reserve Series a step above the rest is our craftsmanship. Created from our popular TF-138 or TF-II thermal doors, we add a decorative overlay to create a genuine carriage house look. Made of 26-gauge steel, our doors are durable to the core. Insulated to keep your home thermally efficient year round, the unique thermal barrier helps guard against the elements. And, our quality finishing process creates a finished look on the inside as well as the outside using a two-coat polyester paint finish for maximum durability. The result is a maintenance-free door with a classic look that's all your own.
